

Implement Application Discovery

Last Modified on 10/23/2026 10:16 am EDT

Implement Application Discovery is a guided onboarding program that helps your team put Application Discovery into practice in your own environment. Over six weekly working sessions, you connect foundational systems, classify your applications, map contracts and spend, and build dashboards and an operating model for ongoing application management.

A promotional banner for the 'Implement Application Discovery' program. It features a dark blue background with a purple and blue abstract graphic of overlapping rectangular blocks on the right side. The Infotech logo is in the top left. The title 'IMPLEMENT APPLICATION DISCOVERY' is in large white capital letters. Below it, it says 'Powered by: CIO Analytics' with a small icon. A paragraph of text describes the program as a guided onboarding program. At the bottom, there is a white button with a blue border that says 'Download the implementation guide (PowerPoint)'.
